

**Claudia V Dominguez**  
**Budget Tracker Notes**

**Login / Sign Up Page**

- Provides a unified interface for user authentication.
- Includes form fields for email and password.
- Uses tab-style navigation to switch between login and sign-up views.
- No authentication logic is implemented yet; this is strictly a visual and structural setup.

**Dashboard Page**

- Displays summary cards for:
  - Total Income
  - Total Expenses
  - Current Balance
- Includes placeholders for interactive charts that will visualize:
  - Spending by category
  - Monthly income vs. expense trends
- Shows a “Recent Transactions” table to preview user activity.
- Serves as the main overview page of the application.

## **Transactions Page**

- Contains a form for adding new income or expense entries.
- Includes fields for transaction type, category, amount, date, and optional notes.
- Provides filter and search controls to help users locate transactions.
- Displays all transactions in a table with placeholder action buttons (Edit/Delete)

## **Responsiveness**

- The interface is fully responsive and adapts to smaller screens.
- Grid layouts automatically collapse into single-column views on mobile devices.
- Tables are scrollable on narrow screens to preserve readability.
